

BASIC PLAN

ABOUT SEO

SEO is a technique which helps search engines find and rank your site higher than the millions of other sites in response to a search query. SEO thus helps you get traffic from search engines.

WHY SEO

The process of Search Engine Optimisation is an integral part of any businesses aiming to establish a prominent online presence. The ability to enhance a website's visibility within organic Search Engine Listings (SERPs) is a crucial tool to propel a business's virtual presence above that of its rivals. The widespread prevalence of Pay Per Click (PPCs) ads – some \$28 billion was spent in 2010 in the US alone – highlights how important Search Marketing continues to be.
